

2021 Beach Nourishment

Project Description

- The project area was located between Florida DEP reference monuments **R-84** and **R-109** (Captiva Island).
- The project consists of the placement of 806,270 cubic yards of beach fill and 350,000 dune plantings along 4.85 miles of shoreline and rehabilitation of existing dunes along the entire Gulf of Mexico shoreline of Captiva Island between Redfish Pass and Blind Pass.
- The project, designed to last beyond 8-10 years, provides necessary maintenance to counteract long-term critical erosion of our beaches, properties, and shorelines.

All Properties on Captiva Benefit from Beach Nourishment

- The beach nourishment project will generate a stream of benefits for property owners on Captiva Island which, ultimately, will show up as an enhancement of property values beyond the levels they would have attained in the absence of the project.
- Gulf-facing Captiva properties are better protected from erosion and storm damage as a result of the nourishment project. Properties are grouped into similar categories based upon engineering data. These are known as the **Storm Protection Benefits Zones**.
- The Project will provide access to an enhanced recreational beach. Captiva properties experience enhancements in values due to increased recreational benefits. Captiva properties are grouped into three distinct categories: **Residential, Residential with Homestead Exemption, and Commercial**.

Storm Protection Benefits

- Only properties that are considered **front line** to the Gulf of Mexico are considered to receive storm protection benefits.
- The storm protection benefit to a property represents the difference between the value of expected property losses if the project is constructed compared to the value of losses if the project is not constructed.

Storm Protection Benefits

- Based on the analysis performed, the erosion-related annual damages over the 22-year simulation period **without the project** in place total approximately **\$6,994,000**.
- **With the project in place**, the annual damages are reduced to **\$4,088,200**.
- This equates to a project related annual benefit of **\$2,905,755**.
- The adjusted benefits, removing public land loss, resulted in a total annual storm protection **benefit to private property owners of \$2,417,971**
